THE PROCESS

ENQUIRIES

Before anything, we'll have a conversation reviewing your project scope as well as a timeline and pricing so that we can make sure everyone's on the same page. Once we've agreed to work together, details are finalized, contracts are signed and a deposit is made and received, we can start and move on with the next stage.

DISCUSS/PLAN

The first thing you'll do is tell us all about your business, what you require and what your aim is. Then, through research and brand analysis, we'll come up with an in-depth plan. Depending on your project this could include things like brand strategy, visual direction and moodboard development.

WORK

The next step will be putting all the planning, research and development to work. We will then start the creative process based on your wants and needs for your project. We will send you samples to review to see if we are on the right track. From there we will keep revising until you are completely happy with the designs/branding.

FINALISE

We will then create your brand style guide which displays your final logo and alternative logos, colour scheme, font palette, and inspiration. From there, we will then install your design into promotional materials and/or website. Remember your final payment will be due at this time. Lastly we will go over everything and make sure you have everything you need so you can show your brand to the world!
